	Document ID	Title
1	US 5987471 A	Sub-folding system in a directory-service-based launcher
2	US 5893122 A	Hyper-media system including plural application processors which execute navigation processing for hyper-media document
3	US 5887171 A	Document management system integrating an environment for executing an agent and having means for changing an agent into an object
4	US 5850518 A	Access-method-independent exchange
5	US 5835698 A	Unilaterally-controlled, time-insensitive, data-link recovery apparatus and method
6	US 5832225 A	Method computer program product and system for maintaining replication topology information
7	US 5828833 A	Method and system for allowing remote procedure calls through a network firewall
8	US 5825772 A	Distributed connection-oriented services for switched communications networks
9	US 5794232 A	Catalog services for distributed directories
10	US 5787442 A	Creating interobject reference links in the directory service of a store and forward replication computer network
11	US 5778385 A	Link manager for managing links integrating data between application programs
12	US 5761683 A	Techniques for changing the behavior of a link in a hypertext document
13	US 5717922 A	Method and system for management of logical links between document elements during document interchange
14	US 5594921 A	Authentication of users with dynamically configurable protocol stack
15	US 5548726 A	System for activating new service in client server network by reconfiguring the multilayer network protocol stack dynamically within the server node
16	US 5504891 A	Method and apparatus for format conversion of a hierarchically structured page description language document
17	US 5497463 A	Ally mechanism for interconnecting non-distributed computing environment (DCE) and DCE systems to operate in a network system
